

Krishna Chaitanya Balasa

krishnachaitanyabalasa@gmail.com | +91 9666307559 | LeetCode | LinkedIn | GitHub

Summary

Software Engineer passionate about building scalable, efficient, and reliable software solutions. Experienced in developing applications that solve real-world problems with a strong focus on code quality, performance, and maintainability. Eager to learn, adapt, and contribute to challenging engineering projects in collaborative environments.

Work Experience

TinyMillion – Frontend Developer Intern

Aug 2026 – Present

Developed responsive frontend features and reusable UI components using React and JavaScript. Collaborated with the engineering team to implement, test, and maintain web application features.

Projects

FixMyRide

Demo | Frontend Repo | Backend Repo

- Developed a full-stack vehicle breakdown assistance platform with secure role-based workflows, enabling users to request roadside assistance and connect with mechanics through a scalable web application.
- Built secure RESTful APIs with JWT-based authentication, role-based authorization, and real-time request tracking, improving service coordination, operational efficiency, and overall user experience.

Collaborative Spreadsheet

Live Demo | GitHub

- Built a real-time collaborative spreadsheet web application where multiple users can edit cells simultaneously with instant synchronization using Next.js, TypeScript, Tailwind CSS, and Firebase Firestore.
- Implemented formula support (SUM, AVERAGE, MAX, MIN), Google authentication, user presence tracking, cell formatting, and CSV/JSON/TSV export.

DevPulse

Demo | GitHub

- Built a graph-powered engineering intelligence platform to identify code experts and recommend relevant reviewers.
- Implemented multi-hop openCypher queries for Expert Finder, Reviewer Router, and Health Radar using Spring Boot and CognitoDB Cloud.

Technical Skills

Programming Languages: Java, Python, C, C++ SQL, JavaScript

Core Computer Science: DSA, Object Oriented Programming, DBMS, Operating Systems, Computer Networks

Backend Technologies: Spring Boot, Spring Security, RESTful APIs, JWT Authentication, Microservices

Frontend Technologies: React, Next.js, HTML, CSS

Databases: PostgreSQL, MySQL, MongoDB

Developer Tools: Git, GitHub, Maven, Postman, IntelliJ IDEA, VS Code, Figma

Software Engineering: SDLC, REST API Design, Unit Testing, Debugging

Cloud: AWS

Soft Skills: Problem Solving, Teamwork, Communication

Education

- **VIT-AP University** (2023 – 2027) – Bachelor of Technology in Computer Science, CGPA: 9.04/10
- **Narayana Junior College** (2021 – 2023) – Intermediate (MPC), Percentage: 97.8%
- **Saint Joseph's High School** (2021) – SSC (10th Standard), Percentage: 100%

Certifications

IBM Gen AI

2025

Achievements

- Solved 600+ problems on LeetCode.
- Completed NPTEL certification in Deep Learning for Computer Vision.
